Factsheet 2023

Sustainability is in our DNA

everyone has acces to affordable healthy, nutritious ***and delicious food,*** *every day*

healthy people | healthy planet | healthy business

de bron van een gezond leven

With the **Hortifootprint score**, we map the environmental impact of our products. We measure this in **16 categories**, such as CO2 emissions, raw material consumption, water and particulate matter.

In 2023, we had **33% lower** CO2 (eq) emissions per kg of product compared to 2020. This puts us on track for **our 2030 target**: 50% less CO2(eq) emissions per kg of product compared to 2020.

Together with our growers, we make reduction plans to reduce our impact. In 2023, our total environmental impact was **42% lower** per m2 than in 2020.

We have set our targets with **SBTi:**
CO2 reduction in line with the 1.5 degree scenario by 2030 as well as **Net-Zero by 2040.**

SCIENCE BASED TARGETS

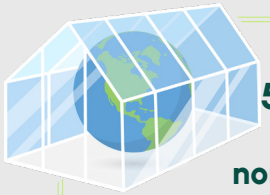
We contribute to **10** of the 17 United Nations development goals.

SUSTAINABLE DEVELOPMENT GOALS

We make our electricity use more sustainable. By switching to LED, we save **over 30%** CO2(eq) per kg of product. In 2023, our area with full LED lighting was **113 ha**.

In regions with water scarcity, we have a **responsible water policy.**

We offer year-round product security and produced **nearly 450 million kg** of salads.



56% of our Dutch acreage uses **non-fossil heat**, such as geothermal heat or biomasssa.

We **reduce plastic** packaging material where possible, choosing rPET and PP wherever possible.

Together with FVO, we started a pilot to grow **without crop protection**.

We organised **9 inspiring meetings** 'Thinking and Doing' for the development of our growers and employees.

We use **AI in the greenhouse** to grow even more efficiently and to match supply and demand.

Our organisation received a **7.9 rating** in the employee satisfaction survey.

Snijpunt

FOOD FELLOWS - LESS WASTE, MORE TASTE -

Together with Food Fellows and Snijpunt, we saved **1.5 mio kg tomatoes and 50,000 kg bell peppers** from waste.

We grow **Fairtrade** tomatoes at our cultivation sites Desert Joy in Tunisia and QTM in Morocco.
